SUMMARY

High-achieving Computer Science and Artificial Intelligence student (GPA 3.77/4.00) with hands-on experience building end-to-end data analytics solutions for leading organizations including Vodafone, Banque Misr, and Uber. Skilled in Power BI (DAX, Star Schema, Power Query), Advanced Excel, ETL processes, and data modeling. Adept at transforming raw, unstructured datasets into interactive dashboards and actionable business insights. Strong foundation in algorithms, data structures, and object-oriented programming (C++).

TECHNICAL SKILLS

Data Visualization & Reporting: Power BI (DAX, Star Schema, Power Query), Microsoft Excel (Advanced Formulas, Pivot Tables, Charts)

Data Engineering: ETL Processes, Data Modeling, Data Cleaning, Star Schema Design

Programming: C++, Object-Oriented Programming (OOP)

Computer Science: Algorithms, Data Structures, Systems Analysis & Design, Statistical Analytics

Documentation: Technical Documentation, Business Requirements

PROJECTS

Data Analyst – Vodafone Qatar Data Analysis | Capstone Project

- Managed a comprehensive data analysis workflow, processing and cleaning highly unstructured raw datasets to ensure accuracy and consistency.
- Designed and implemented a Star Schema data model to optimize data relationships and enhance reporting performance.
- Developed an interactive Power BI dashboard to visualize key business KPIs and deliver actionable insights to stakeholders.
- Performed advanced data transformation and ETL processes using Power Query to ensure data integrity and reporting accuracy.

Data Analyst – Banque Misr Financial Data Analysis | Capstone Project

- Conducted deep-dive financial data analysis using Excel and Power BI to identify trends and behavioral patterns in customer data.
- Cleaned and standardized large-scale banking datasets, ensuring data quality and consistency for accurate reporting.
- Built dynamic dashboards to track financial KPIs, significantly improving visibility into business performance.
- Leveraged advanced Excel functions and Power BI visuals to simplify complex financial data for non-technical stakeholders.

Data Analyst – Uber Ride-Sharing Data Analysis | Capstone Project

- Analyzed ride-sharing data to identify peak demand hours (30% higher request volume) and high-demand geographic locations, informing operational strategy.
- Discovered revenue trend increases of 23.5% through time-series analysis of trip and fare data.
- Cleaned and pre-processed large trip datasets, handling missing values and formatting time-series information for analysis.
- Created interactive maps and Power BI visuals to track driver performance and monitor trip distribution across regions.

EDUCATION

Bachelor of Science – Computer Science and Artificial Intelligence | Benha University, EgyptExpected 2028

Current GPA: 3.77 / 4.00 | **Academic Level:** Completed Second Year

Relevant Coursework: Algorithms, Data Structures, Object-Oriented Programming (C++), Systems Analysis & Design, Statistical Analytics

LANGUAGES

Arabic: Native

English: B2 – Upper Intermediate
