SUMMARY

Computer Science & AI student (GPA 3.77/4.00) with hands-on, self-driven experience delivering end-to-end analytics projects using Python, Power BI, and Excel. Built a Python-based RFM customer segmentation model plus multiple industry-style Power BI dashboards spanning retail, HR, supply chain, and sports analytics. Comfortable across the full pipeline: data cleaning, star-schema modeling, DAX, and data storytelling. Seeking a Data Analyst internship.

TECHNICAL SKILLS

Programming & Analysis: Python (Pandas, RFM/Customer Segmentation), SQL, C++, OOP, Statistical Analysis, Time-Series Analysis

Visualization & BI: Power BI (DAX, Star Schema, Power Query, Decomposition Trees), Advanced Excel (Pivot Tables, VLOOKUP, INDEX/MATCH, Advanced Formulas)

Data Engineering: ETL Processes, Data Modeling, Data Cleaning & Wrangling, Star Schema Design, Exploratory Data Analysis (EDA)

Tools: Power BI Desktop, DAX Studio, Power Query, Excel, Git, GitHub

Soft Skills: Data Storytelling, Technical Documentation, Business Requirements, Cross-functional Collaboration

KEY PROJECTS (SELF-STUDY, 2025–2026)

RFM Customer Segmentation

Python · Pandas

- Built a Recency-Frequency-Monetary (RFM) model in Python on an online retail transaction dataset to score and segment customers.
- Classified customers into actionable groups (Champions, At Risk, Hibernating) to support targeted retention and marketing strategy.

Vodafone Qatar Customer Churn Analysis

Power BI · DAX · Star Schema

- Cleaned unstructured raw datasets with Power Query and built a star schema model to optimize dashboard performance.
- Identified a 26.5% churn rate and the key drop-off factors, enabling a targeted retention strategy for executive stakeholders.

Banque Misr Financial Analysis

Power BI · Excel

- Performed EDA on large-scale banking datasets, identifying customer behavioral trends and financial patterns.
- Built dynamic dashboards for transaction volume, customer segments, and revenue KPIs, simplifying insights for non-technical stakeholders.

Samsung Executive Dashboard & Supply Chain Report

Power BI · DAX

- Built an executive Power BI report tracking \$176.95M in revenue (FY 2023–2024) across regions and product categories.
- Designed a star schema and custom DAX measures (Total Sales, Unit Margin %, Top-Selling Series) to support supply chain and inventory decisions.

HR Attrition Analysis

Power BI · Star Schema

- Analyzed attrition patterns across 1,470 employees, identifying a 16.12% attrition rate and its key drivers.
- Modeled a star schema and built DAX measures to give HR stakeholders a clear, interactive view of workforce risk.

More projects (FIFA World Cup 2026 Dashboard, Automotive Sales BI, Uber Ride-Sharing Analysis, Teen Mental Health & Social Media) on portfolio: sherifazb.github.io

EXTRACURRICULAR ACTIVITIES

Team Participant & Finalist

GDG Bootcamp & Competition, 2024

- Achieved 5th place out of all competing teams; delivered technical solutions under tight deadlines within a multidisciplinary team.

Student Coordinator (Volunteer)

Benha University, 2024 – Present

- Managed oral exam logistics for 30+ students and served as the communication bridge between professors and students.

EDUCATION

B.Sc. Computer Science & Artificial Intelligence

Expected May 2028

Benha University, Egypt | GPA: 3.77 / 4.00 | Completed: 2nd Year

Coursework: Algorithms, Data Structures, OOP (C++), Systems Analysis & Design, Statistical Analytics, Database Systems, Machine Learning Fundamentals

LANGUAGES

Arabic: Native | English: B2 – Upper Intermediate
