

SHERIF AYMAN

Junior Data Analyst | Computer Science & AI Student

Benha, Egypt | +20 01141129696 | sherifaymanazb@gmail.com | [linkedin.com/in/sherifazb](https://www.linkedin.com/in/sherifazb) | github.com/SherifAzB | sherifazb.github.io

CAREER OBJECTIVE

Junior Data Analyst (Computer Science & AI student, GPA 3.7/4.00) skilled in SQL, Python, Power BI, and Excel, with hands-on experience building star-schema dashboards and a Python RFM segmentation model across retail, banking, HR, and supply-chain data. Seeking a Junior Data Analyst or an internship role to turn business questions into measurable, stakeholder-ready insights.

TECHNICAL SKILLS

- Programming & Analysis: SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Statistical Analysis
- Visualization & BI: Power BI (DAX, Star Schema, Power Query, Decomposition Trees, KPI Development), Tableau (Fundamentals), Advanced Excel (Pivot Tables, VLOOKUP, INDEX/MATCH)
- Data Engineering: ETL Pipelines, Data Modeling, Data Cleaning & Validation, Star Schema Design, Exploratory Data Analysis (EDA)
- Analysis Themes: Executive Reporting, Retention Strategy, Revenue-at-Risk Analysis, Data Storytelling, Stakeholder Communication
- Tools: Power BI Desktop, DAX Studio, Power Query, Jupyter Notebook, Git, GitHub

KEY PROJECTS — SELF-TRAINING ON PUBLIC DATASETS (2025–2026)

Independent practice projects using publicly available datasets to build real-world analytical skills. No client or company relationship involved.

Telecom Customer Churn Analysis *Power BI · DAX · Star Schema* Public dataset (Vodafone Qatar) — self-training [[GitHub](#)]

- Cleaned unstructured raw data with Power Query and built a star-schema model to optimize dashboard performance.
- Identified a 26.5% churn rate and its key drop-off factors, enabling a targeted retention strategy for executive stakeholders.

Customer Churn & Revenue-at-Risk Analytics *Power BI · DAX · Data Storytelling* Public dataset (Telecom) — self-training [[GitHub](#)]

- Built a churn and revenue-risk model on a 7,018-account telecom dataset, quantifying \$2.87M in at-risk revenue.
- Packaged findings into a stakeholder-ready recovery plan with a 7-play retention roadmap.

Executive Sales & Supply Chain Dashboard *Power BI · DAX* Public dataset (Samsung) — self-training [[GitHub](#)]

- Built an executive Power BI report tracking \$176.95M in revenue (FY2023–2024) across regions and product categories.
- Designed a star schema and custom DAX measures (Total Sales, Unit Margin %, Top-Selling Series) to support supply chain decisions.

RFM Customer Segmentation *Python · Pandas · NumPy* Public dataset (Online Retail) — self-training [[GitHub](#)]

- Built a Recency-Frequency-Monetary model on an online retail dataset, segmenting customers into Champions, At Risk, and Hibernating groups to support targeted retention.

More self-training projects on public datasets (HR Attrition, Banque Misr, FIFA World Cup 2026, Automotive Sales, Uber Ride-Sharing) on portfolio: sherifazb.github.io

FREELANCE EXPERIENCE

Real, paid client engagement — distinct from the self-training projects above.

Sales Quotation Automation Tool — Freelance Client Project *Excel · VBA · Process Automation* Dubai Client

- Replaced a manual, error-prone quotation process for a live business client with an automated system featuring dynamic price-list linking and print-ready client quotes.
- Built a VBA-driven sales archive that logs every quotation, creating a data foundation for future sales-trend analysis.
- Delivered with user documentation for non-technical staff and handed the system off for daily business use.

CERTIFICATIONS

Data Analysis Training — Instant Software Solutions 2026

- Completed 130+ hours of hands-on training covering Data Analysis, Power BI, DAX, and Python. Verified: [Verification link](#).

AI & Data Science Track — Digital Egypt Pioneers Initiative (DEPI) In Progress — Exp. Dec 2026

- Ministry of Communications & IT (Egypt), in partnership with IBM; covers Python, SQL, Data Analysis, Data Visualization, and Machine Learning.

EDUCATION

B.Sc. Computer Science & Artificial Intelligence *Expected May 2028*

Benha University, Egypt | GPA: 3.7 / 4.00

Coursework: Design & Analysis of Algorithms, Data Structures, Object-Oriented Programming (C++), Discrete Mathematics, Linear Algebra, Statistics & Statistical Analysis, Systems Analysis & Design, Information Systems

EXTRACURRICULAR ACTIVITIES

Team Participant & Finalist — GDG Bootcamp & Competition 2024

- Achieved 5th place out of all competing teams, delivering technical solutions under tight deadlines within a multidisciplinary team.

Student Coordinator (Volunteer) — Benha University 2024 – Present

- Managed oral exam logistics for 30+ students and served as the communication bridge between professors and students.
